

UETMT has developed and deployed 150+ **competency libraries**, which comprise thousands of Competency Units (CUs)

Libraries are discipline-based or industry-based, for example:

- Drilling Engineering
- Mechanical Engineering
- Rotating Equipment Engineering
- Plant Operations
- HC
- Health, Safety Environment
- Security
- Finance and Audit

Libraries are used to:

- Reduce time in a competency project
- Customize benchmarked content to client jobs
- Provide links to approved learning
